DETAILED ACTION

Election/Restrictions

Applicant elected Species II, and claims 1-7 reading thereon. Because claim 1 is a generic claim and is allowable, the election of species is withdrawn to at least some of the species. In particular, the election of species is withdrawn to the species reading on claims 8-12 which depend from claim 1. Additionally, the Applicant has withdrawn the traversal of the restriction requirement.

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter.

The prior art fails to teach a positioning unit mounted in said first housing and including a stopper that is disposed adjacent to said rotatable part, and that is movable in said transverse direction relative to said first housing between an engaging position, in which said stopper moves upwardly to engage one of said rotatable part and said second housing when said second housing is positioned at one of said first and second angular positions, thereby preventing rotation of said rotatable part and said second housing about said first axis, and a disengaging position, in which said stopper moves downwardly to disengage from said one of said rotatable part and said second housing, thereby permitting rotation of said second housing and said rotatable part about said first axis.

Examiner's Amendment

The specification has been amended to correct a spelling error on page 11. In particular, on page 11, line 14, "hear" has been changed to -heart-.
